ABOUT ME

I started my programming journey as an industrial automation programmer but eventually fell in love with web development because of the fast-paced, fast-growing and more challenging tech industry. I find enjoyment in learning new things and applying what I have learned to create a more high-quality software.

SKILLS

MongoDB	HTML
Express.js	CSS
React.js	JavaScript
Node.js	Git

EXPERIENCE

Photography Website - Landing page / Portfolio

HTML, CSS, and JavaScript

- Ensured proper construction of HTML using correct use of HTML semantic tags.
- Used a minimalist design styling using CSS to help in conveying the message of the website to the users.
- Applied JavaScript for DOM manipulation for user micro-interactions.

Layag Travel Tours: Full-stack E-commerce Web Application using MERN architecture

MongoDB, Express.js, React.js, Node.js

- Utilized React.js for the frontend UI and Node.js with Express.js framework for the backend that connects to the MongoDB database.
- Implemented a more secure authentication and authorization of users using JWT cookie.
- Handled payments using Stripe and utilized its webhooks for safer creation of user bookings.

Health and Activity Tracker App: Full-stack Web Application using MERN architecture

MongoDB, Express.js, React.js, Node.js

- Used React.js library for the UI and implemented data visualization libraries including Leaflet and Chart.js for mapping GPS coordinates and presenting data effectively.
- Built a robust and secure backend server and database using Express.js and Node.js making use of RESTful API to connect to the MongoDB database.

EDUCATION

Bachelor of Science - Mechatronics Engineering
Saint Louis University, Baguio City

Full-stack Web Development Bootcamp
Uplift Code Camp
